

GLANCE DENTAL

Informed Consent and Authorization for Periodontal Treatment Utilizing Scaling & Root Planning (SRP)

FACTS FOR CONSIDERATION

Dental x-rays will be taken to check the condition of the bone that supports your teeth. A thorough examination of your oral cavity will be done measuring the pockets under the gums surrounding your teeth to determine which periodontal treatment(s) your gum condition requires.

Treatment involves removing the bacterial substance known as plaque, which is the principal cause of periodontal disease and calculus, which is an accumulation of hard deposits on the tooth above or below the gingival margin. The treatment involves scaling which uses sharp hand instruments to remove calculus, plaque, and bacteria; curettage which scrapes any necrotic (dead) tissue and cleans the area or pocket, and root planning which smooths and contours the root surface to remove the debris and cementum found in the periodontal pocket.

Medications or a special mouth rinse to help control the growth of bacteria may be part of treatment. The success of the treatment depends in part on your efforts to brush and floss daily, receive regular cleaning as directed, follow a healthy diet, avoid tobacco products and follow proper home care taught to you by this office.

A topical or local anesthetic may be administered depending on the sensitivity of the area to be treated.

BENEFITS OF NON-SURGICAL PERIODONTAL TREATMENT, NOT LIMITED TO THE FOLLOWING

Regular, professional cleanings: create a clean environment in which your gums can heal; reduce the chances of further irritation and infection; make it easier for you to keep your teeth clean; and decrease the cost of replacing teeth lost due to gum disease.

RISKS OF NON-SURGICAL PERIODONTAL TREATMENT, NOT LIMITED TO THE FOLLOWING

I understand that my gums may bleed or swell and I may experience moderate discomfort for several hours after the anesthesia wears off. There may be slight soreness for a few days, which may be treated with pain medication. I will notify the office if conditions persist beyond a few days.

I understand that because cleanings involve contact with bacteria and infected tissue in my mouth, I may also experience an infection, which would be treated with medication such as antibiotics or as recommended by the dentist.

I understand that holding my mouth open during treatment may temporarily leave my jaw feeling stiff and sore and may make it difficult for me to open wide for several days afterwards. However, this can occasionally be an indication of a further problem. I agree to notify Glance Dental right away if this or other concerns arise.

I understand that as my gum tissues heal, they may shrink somewhat, exposing some of the root surface. This could make my teeth more sensitive to hot or cold.

GLANCE DENTAL

Informed Consent and Authorization for Periodontal Treatment Utilizing Scaling & Root Planning (SRP)

I understand that depending on my current dental condition, existing medical problems, or medications I may be taking, these methods alone may not completely reverse the effects of gum disease or prevent further problems.

I understand that I may receive a topical or local anesthetic and/or other medication. In rare instances patients may have a reaction to the anesthetic, which could require emergency medical attention. Because of the anesthesia, I may need a designated driver to take me home. Rarely, temporary or permanent nerve injury may result from an injection which may result in lip or tongue numbness in the affected area and may require further intervention to be determined by the dentist.

I understand that all medications have the potential for accompanying risks, side effects, and drug interactions. Therefore, it is critical that I tell my dentist of all medications I am currently taking.

CONSEQUENCES IF NO TREATMENT IS ADMINISTERED, NOT LIMITED TO THE FOLLOWING

I understand that if no treatment were administered or ongoing treatment was interrupted or discontinued, my periodontal condition would continue and probably worsen. This could lead to further inflammation and infection of gum tissues, tooth decay above and below the gum line, deterioration of bone surrounding the tooth and eventually, the loss of teeth.

ACKNOWLEDGEMENT OF FINANCIAL POLICIES

I understand that Glance Dental will do its best to maximize any insurance benefits, but cannot guarantee coverage of this procedure by my insurance company (if applicable). I understand I am responsible for the cost of the procedure, including any co-pays or deductibles. I confirm that I have received a treatment proposal outlining the costs for this treatment, including any applicable insurance benefits estimates.

I understand that every reasonable effort will be made to ensure that my condition is treated properly, although it is not possible to guarantee perfect results which may need advanced surgical treatment by a gum specialist. By signing below, I acknowledge that I have received adequate information about the proposed treatment, that I understand this information;

I have had the opportunity to have my questions answered prior to consenting to treatment.
